Our Class AI Social Contract

AI can support our learning, but people remain responsible for every choice, claim, and submission.

Our guiding idea: Use AI to help you think - not to avoid thinking.

Our Agreements	Why It Matters
TRANSPARENCY **We say when and how AI helped us.** We name the tool and its role, such as brainstorming, revising, or checking.	Honest disclosure builds trust and shows what you did yourself.
TRANSPARENCY **We keep our drafts, notes, and prompts.**	Your process shows your thinking and helps your teacher support your learning.
PRIVACY **We never enter private information.** This includes names, contact details, passwords, grades, health information, and another person's work.	AI services may store what you enter. Protecting data protects you and others.
PRIVACY **We use school-approved tools and accounts.**	Approved tools are reviewed for student safety, privacy, and age requirements.
FAIRNESS **We check AI output for bias, stereotypes, and missing viewpoints.**	AI can repeat unfair patterns found in its training data.
FAIRNESS **We do not use AI to gain an unfair advantage.**	Class rules should give every student a fair chance to demonstrate learning.
APPROPRIATE USE **We follow the AI rule for each assignment:** allowed, limited, or not allowed.	Different assignments measure different skills, so the rules may change.
APPROPRIATE USE **We use AI to learn and create - never to harm, embarrass, impersonate, or deceive.**	Digital actions affect real people and have real consequences.
INTEGRITY **We do not submit AI-generated work as our own.**	Your grade should reflect your knowledge, skills, and effort.
INTEGRITY **We verify facts, calculations, quotations, and sources before using them.**	AI can sound confident and still be incomplete or wrong.
INTEGRITY **We remain the authors and decision-makers.** We revise AI suggestions in our own voice and take responsibility for the final work.	AI can assist, but human judgment stays final.
SHARED RESPONSIBILITY **We ask when a rule is unclear and speak up when something feels unsafe or unfair.**	A social contract works only when everyone can question, discuss, and improve it.
